**Assessment Using Testing**

1. Teacher decides which concepts are to be assessed by the test.
2. Test is constructed to assess these concepts.
3. Test is administered to students.
4. Results of students’ performances are analyzed.

**Questions to Consider**

1. Would this strategy work with the student(s)? Why or why not?
2. If not, how would the setting/students need to be different in order to apply the strategy? Why would this work?
3. If the strategy could be applied to the student(s), would it be a benefit at this time? Why or why not?
