**Minnesota Graduation Standards**

Name: 

Date: 

Directions: Find the standards for the grade level and subject you work in (if you do not currently work with a student, choose any grade level). With the goal of finding information on standards, answer the following questions. The link at the bottom of this section will lead to information on k-12 standards in Minnesota.

- Look at the list of standards in your chosen subject and closest grade level. What are three standards you believe the students you work with (or most students) have already nearly mastered?

- What are three standards that may present these students (or most students) with difficulty in mastering them? Explain why you think this.

- In a paragraph, describe how you see the standards being met in the classroom(s) you work in. (If you do not work in a classroom, skip this question.)
